

COVID-19 SPREADS LIKE WILDFIRE IN COMMUNITIES

IN ONE OUTBREAK IN NSW, THE VIRUS SPREAD TO OVER 4,000 ABORIGINAL AND TORRES STRAIT ISLANDER PEOPLE IN 8 WEEKS

We know that the Delta strain of the COVID-19 virus spreads faster and more easily. In fact, in just eight weeks the virus spread from just a few to more than 4,000 Aboriginal and Torres Strait Islander people across many communities in one part of New South Wales this year. The best way to protect yourself and the people around you is to get vaccinated.

Have a yarn to your healthcare worker about getting vaccinated today.

DON'T WAIT, VACCINATE!
